

Rowboats, Sailboats and Submarines

Topic Work Wednesday 1st July

MOVING TOYS

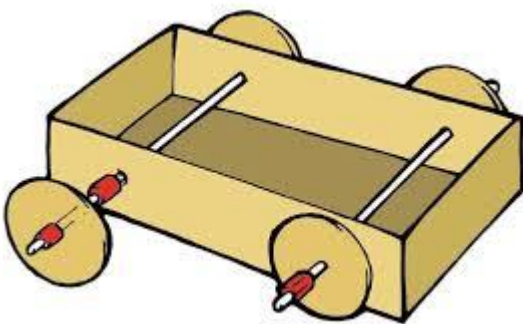

Making your vehicle

Today you are going to make your vehicle. Remember to look at your plan from yesterday to remind you of any ideas.

You will need to ask an adult at home to help you with today's lesson.

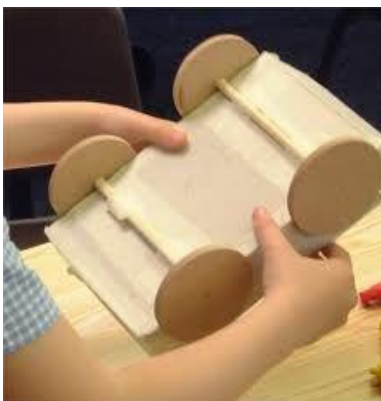

You can decorate your vehicle tomorrow.

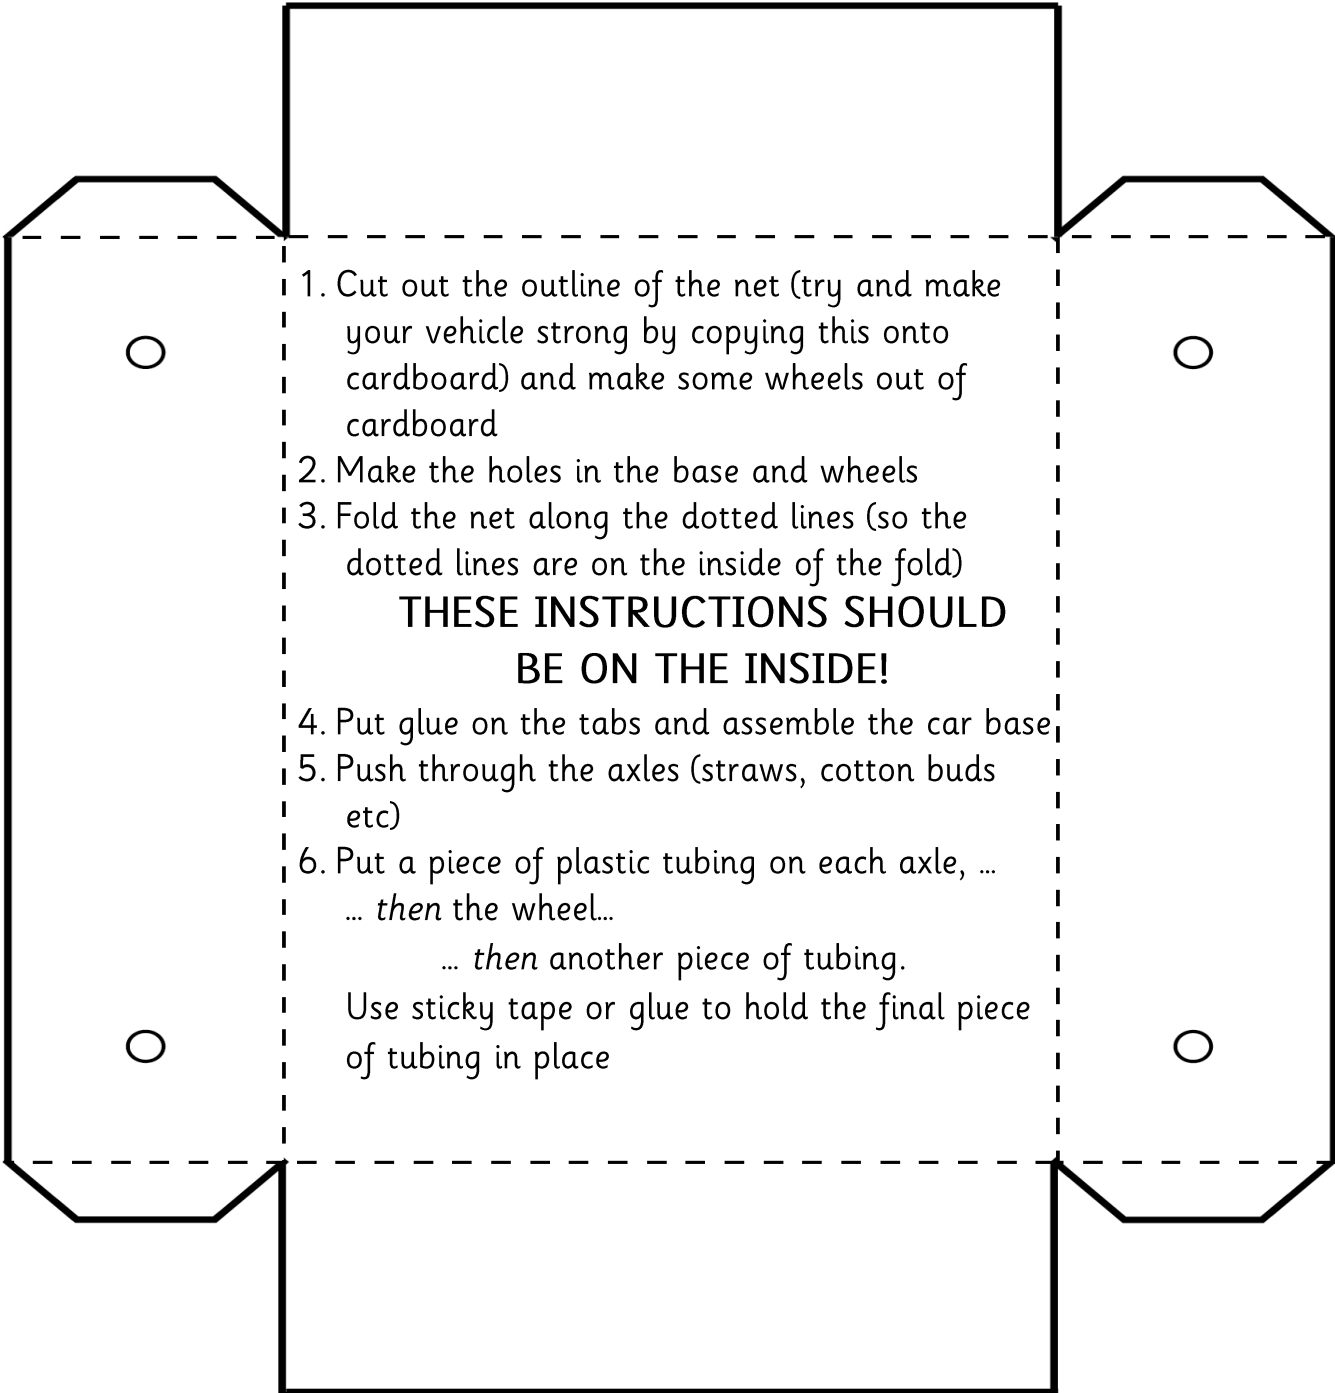

Today, you are going to create the base.

Use the instructions on the next page to help you. You could also use your own design/frame.

Other ideas:

- 
1. Cut out the outline of the net (try and make your vehicle strong by copying this onto cardboard) and make some wheels out of cardboard
 2. Make the holes in the base and wheels
 3. Fold the net along the dotted lines (so the dotted lines are on the inside of the fold)
- THESE INSTRUCTIONS SHOULD
BE ON THE INSIDE!**
4. Put glue on the tabs and assemble the car base
 5. Push through the axles (straws, cotton buds etc)
 6. Put a piece of plastic tubing on each axle, ...
... *then* the wheel...
... *then* another piece of tubing.
Use sticky tape or glue to hold the final piece of tubing in place
