

DT

In your opinion, what makes a playground structures fun to use?

Take a look at the below playground structures. Which do you like the best/least? Why is that?

Activity

Design your own playground structure, perhaps using some of the ideas and elements from the pictures on this page.

Things you might want to consider.

*Will it be one tall structure with things coming off it?
Two structures linked somehow? A flatter area with obstacles?*

How will children climb up the structure – ladders/stairs/rope/netting etc

How will children get down – slides/pole/jumping steps/rollers

Do they climb up within the structure or on the outside?

Will there be more than one layer?

Will it have a theme? Underwater, space etc.
