|---|---|---|

## Cross curricular links

**Maths:** counting and grouping data into correct categories.

## Key skills

- To be able to describe objects using labels
- To be able to match objects to groups
- To be able to identify the label for a group of objects
- To be able to count objects
- To be able to group objects
- To be able to count a group of objects
- To be able to choose how to group objects
- To be able to describe groups of objects
- To be able to record how many objects are in a group

## Key Vocabulary/definitions

**Group** - A group is when we put things that are the same together, like all the red blocks in one pile and the blue ones in another pile.

**Search** - In computing, we type words to find pictures, games, or answers on a computer.

**Data set** - A data set is a collection of information. It's like having a list of everyone's favourite ice cream flavours in your class!
