## Cross curricular links

Numeracy- sorting and comparing

## Pictures/photos relevant to topic

## Key skills

- Explore and compare the differences between things that are living, dead, things that have never been alive.
- Describe how different habitats provide for the basic needs of different kinds of animals/plants and how they depend on each other.
- Identify that most living things live in habitats to which they are suited.
- Identify and name a variety of plants and animals in their habitats, including micro-habitats [pond, river, sea].
- Identify and name a variety of plants and animals in their habitats, including micro-habitats [pond, river, sea] food.

## Key Vocabulary/definitions

Basic Needs - a need is something required for a safe, stable and healthy life.

Habitat - the natural home or environment of an animal, plant, or other organism.

Micro-habitat - a smaller area where a plant or animal lives.

Variety - a number of different types of things, especially ones in the same category.

## Key Facts

Identify living things that can be found in water (rivers, seas, ponds) and make comparisons.
