

Sharing and Grouping Investigation

Jo and Jamil were given a bag of lollies.

They shared them out evenly and had one left over.

Just as they had finished sharing them their three friends came along.

They wanted some lollies too so the children shared them out again between all of them.

This time they had two lollies left over.

How many lollies could there have been in the bag?

How can you prove you have found all the solutions?

Hint- the boxes below could be useful...
