

Maths activity – 1.7.20

Doubling

Should

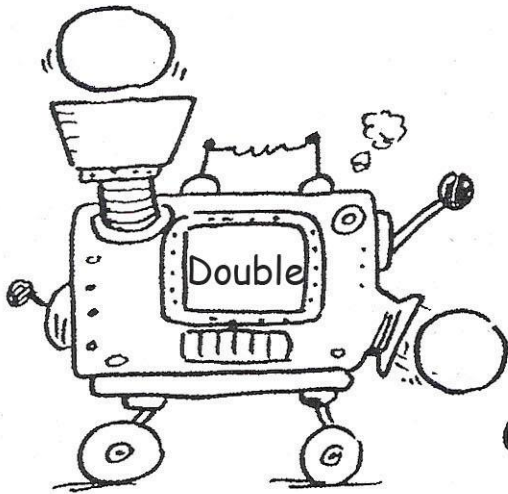

When we double, we add the same number to itself, so 'double 1' is the same as '1+1'. These doubling machines add the same amount to the bubble that comes in the top. Use your fingers to help you add the number to itself and write the answer in the bubble coming out the other end of the machine.

Could

If your child would like an extension, ask them to use the answers they found for the questions above to fill in this table. Here, the machine automatically doubles any number put into it. The first one has been filled in for you.

in	1						
out	2
