

# Maths activity – 13.7.20

## Number

### To start

Play the game 'Helicopter Rescue' by following the link below. You can choose which range of numbers to practice number recognition for, we should be learning all of the numbers up to 30 at the moment but if your child is finding that hard, they could practice up to 20 for now & if they'd like a challenge, they could try up to 50 or even 100.

<https://www.topmarks.co.uk/learning-to-count/helicopter-rescue>

### Should

Read each of these numbers out loud to your child and ask them to write them numerically in the box next to them. The first has been completed for them. If you can't print the sheet, ask them to write the numbers on a piece of paper.

Seventeen

Twelve

Eight

Twenty-two

Fourteen

Twenty-four

Next, read these to your child and ask them to count on or back to find and write down the number that is one more or one less than the given number.

What is one more than 11?

What is one less than 20?

What is one more than 15?

What is one less than 9?

### Could

If your child would like a challenge, ask them to complete these grids. Each has a number that is greater than 20 in the middle and spaces for your child to fill in the numbers that are one more and one less. The first has been completed for them.

19	20	21
----	----	----

	24	
--	----	--

	33	
--	----	--

	40	
--	----	--

	27	
--	----	--

	35	
--	----	--
