

## Maths activity – 9.7.20

### Sharing

#### Should

Read these word problems to your child and ask them to solve them by sharing out objects, like we did on Tuesday.

- Gregory has 12 colouring pencils. He shares them between 6 children. How many pencils do they each get?
- Eleanor cuts a pizza into 8 pieces. She shares it between 4 people. How many slices does each person get?
- Jill shares 9 sweets between 3 people. How many sweets does each person get?
- Sara has 10 pieces of paper. 2 children want to do some drawings so she shares them out equally between them. How many pieces of paper do they get each?
- Diane has a box with 6 reading books in it. She shares out the books fairly between 3 children. How many books do they get each?
- Faye has 20 apples to share out. There are 5 children. How many apples do they get each?

### Could

If your child would like a challenge, ask them to check whether I have got these questions right or wrong and tick or cross them. They should check by sharing out objects. The first two have been done for them.

Share 8 into 2 groups.

4 

Share 9 into 3 groups.

2 

Share 10 into 5 groups.

2

Share 12 into 3 groups.

4

Share 15 into 3 groups.

3

Share 6 into 2 groups.

3

Share 5 into 5 groups.
