Examples of search engines.

Key skills

- Use technology responsibly.
- Use search technologies effectively [such as World Wide Web].
- Identify a range of ways to report concerns about content.

Key Vocabulary/definitions

- Reliability: When information is correct, it is 'reliable'.
- Search engine: A program that finds webpages on the web.
- Advert: Used by media organisations to provide information and promote *media texts* like TV shows and music albums.
- Bot: A bot is a computer program which acts automatically. It may do things that a person wouldn't normally do, or take a long time to do.
- Content: Content is any kind of material that can be read or watched online, on television, or in print.

Key facts

Top tips for spotting fake news:

• If it sounds too amazing or too shocking to be true - it probably isn't true.

• Consider whether the story has been featured on a main news channel or in another trusted source.

• Check the facts on a trusted website.

• Look at who is producing the story.
